RE: Project recognition

Dear Pat,

The Wisconsin Department of Transportation issued the 2008 award for Excellence in Large Structures to Marquette Constructors for the Marquette Interchange Project. The project was selected because of the quality of work, early completion of the project and the level of cooperation that was exhibited between the Department and the contractors involved with the project. Everyone involved with the project should feel extremely proud about being part of a job that received this prestigious award.

Marquette Constructors would like to thank PIG's project managers, superintendents and field personnel for their efforts and contributions that helped us achieve this award. In the first phase of the project your Company proved that the necessary forces and equipment would be available to complete the work within the required time frame. Throughout the job when ever there was a critical phase or conflicting schedules your managers were there to provide solutions to keep the project moving. In the last year of the project the 42,000 cubic yards of LWCF in the TW ramp controlled the early completion of the project. PIG's willingness to begin placement of LWCF a month early during a time of year that is prone to weather delays was a major factor in early completion of the project. Likewise, your crews were more than willing to adjust the placing schedules to take advantage of favorable weather conditions. Once again thanks for your efforts.

Sincerely,

MARQUETTE CONSTRUCTORS, LLC.

Dennis M. Maney P.E.,
